

Requirement ID	Requirement
GCS-FUN-001	The Ground Control Station shall initialize all required mission software prior to flight operations.
GCS-FUN-002	The Ground Control Station shall support mission planning and configuration prior to launch.
GCS-FUN-003	The Ground Control Station shall display aircraft telemetry during mission execution.
GCS-FUN-004	The Ground Control Station shall transmit operator commands to the aircraft.
GCS-FUN-005	The Ground Control Station shall display payload imagery received from the aircraft.
GCS-COM-001	The Ground Control Station shall establish bidirectional telemetry communications with the aircraft.
GCS-COM-002	The Ground Control Station shall recover communications following a telemetry interruption.
GCS-HMI-001	The Ground Control Station shall provide an integrated operator workstation for mission execution.
GCS-HMI-002	The Ground Control Station shall support keyboard and pointing-device input for operator control.
GCS-PWR-001	The Ground Control Station shall operate using an internal rechargeable battery power source.
GCS-PWR-002	The Ground Control Station shall provide fused and regulated electrical power to internal subsystems.
GCS-MEC-001	The Ground Control Station shall utilize a portable protective enclosure for transportation and operation.
GCS-MEC-002	Internal hardware shall be securely mounted to prevent movement during transportation and operation.
GCS-INT-001	The Ground Control Station shall interface with the UAV flight controller.
GCS-INT-002	The Ground Control Station shall interface with the telemetry communication subsystem.
GCS-SW-001	The Ground Control Station shall operate using a Linux-based operating system.
GCS-SW-002	The Ground Control Station shall support operation of QGroundControl mission software.
GCS-SAF-001	The Ground Control Station shall incorporate overcurrent protection within the electrical power system.

GCS-SAF-002	The Ground Control Station shall provide the operator with the capability to safely remove electrical power from the system.
